

To: Peter Hopman , ecoSolv Technologies, LLC

Peter,

This letter has been written to confirm that Highbury Canco Corporation will allow the product ecoAgra eA300 concentrate to be applied to processing tomatoes grown for H.C.C.

We neither recommend nor endorse the use of this product but as it has been registered by the Canadian Food Inspection Agency under the fertilizers act, we see no reason to discourage the use of it either.

Sincerely

Tim Suitor

Highbury Canco Corporation.
